AND TECHNOLOGY**

# **Multiscale Modelling**

**Mateusz Sitko**

**Faculty of Metals Engineering and Industrial Computer Science  
Department of Applied Computer Science and Modelling**

Issues	
1	Organizational class - simple grain growth CA + visualization
2	Microstructures export/import to/from txt files, pictures.
3	Modification of cellular automata grain growth algorithm- inclusions (at the beginning/end of the simulation)
4	Modification of CA grain growth algorithm - influence of grain curvature
5	<b>Modification of CA grain growth algorithm - substructures CA</b>
6	Modification of CA grain growth algorithm - boundaries coloring
7	<b>Reports 1st part</b>
8	Monte Carlo grain growth algorithm
9	Modification of MC grain growth algorithm - substructures CA, MC
10	MC static recrystallization algorithm - energy distribution
11	MC static recrystallization algorithm - nucleation
12	MC static recrystallization algorithm - growth
13	<b>Reports 2nd part</b>
14	Final degree

## Simple Grain Growth CA algorithm

2 grains  
Von Neumann neighborhood

## Substructure CA->CA

Step 1: Simple grain growth CA

Step 3: 2nd grain growth CA

Step 2: Grains selection

## Dual phase CA->CA

Step 1: Simple grain growth CA

Step 3: 2nd grain growth CA

Step 2: Grains selection

Step 1: Simple  
grain growth CA

Step 2: Grains selection
